

How do we communicate in an artistic way?

We live in a seemingly peaceful era. Behind this superficial prosperity are all kinds of barriers and crises, and all kinds of disharmonious brilliance show the extreme luxury of material. But our thoughts are becoming poorer and more boring. How can our increasingly weak bodies bear our souls. We need to restart our spiritual consciousness and connect with this world again from a deep level.

The soul inherited in our blood is incomplete and our lives are constantly repairing this deficiency. When each event triggers the hidden code that we hid in the lineage, we will gain "knowledge". And this kind of "knowledge" and reality "knowledge" contrast, we will have knowledge and grow. This is my path to self-awakening, recounting the source of the blood, the spiritual solitude, and the rebuilding of the soul.

When we cannot exhaust the truth of the soul, we will be in awe of the unknown. And all our efforts are to grow and mature a little bit in the process of searching for the truth, and then slowly awaken the soul. The opposition of the will and the game of spirit will make our minds face subversive touch points.

We are a generation with scars, walking on the edge of fragile relationships. Always trying to talk to others and the world in an artistic way. Or in a confrontation, communicate with a sceptical eye.

In the pain, my feelings are more sensitive and my consciousness is clearer... As we move forward with heavy burdens, we feel the greater miracle of life and the deeper love for the world.

This time, I submitted the painting "Casting the soul-confrontation" to participate in this event. Interpreting our physical and mental wounds in an artistic way, so that the soul can be comforted.
