

Relationship

COVID-19 gave me a chance to think deeply about many things, including relationships, families, friends, couples and the relationship between humans and nature.

I'd been living in a very solid self-world before, but I prefer to cherish all kinds of relationships around me after isolation.

So I learn how to focus on the sunny side in relationship to intelligently keep the balance between the inside-world and outside-world.

In this perspective, I should thank the pandemic, as they say, every crisis carries the gift.

As an artist, I build links with people and make new friends through my artwork.

Hopefully, I could do it forever. If you would like to buy a piece of my art, please contact me.
